

BEESWAX FOOD WRAPS

ECO-FRIENDLY - REUSABLE - ZERO WASTE

Beeswax wraps are an eco-friendly substitution for plastic wraps and bags.

Set of 3: 8x8, 10x10, 12x12

Ingredients: 100% Cotton, organic beeswax, organic jojoba oil, natural pine resin

The wrap will stick to itself and the warmth of your hands will mold the wrap around the bowl or food. Use a rubber band or string to reinforce closure if desired.

Wash in cool water with a mild soap and air dry. Store folded up in a drawer away from sunlight and heat sources.

You can use the beeswax wraps to store foods such as fruit, vegetables, cheese, or lunch meats in sandwiches, however, avoid using them with raw meat or seafood.

Wraps last 1-3 years and can be brought back to life with more wax. Compostable.
